### EXPERIENCE

Apr 2020 – Present

Software Development Intern (Remote) • TitanDLT

Aureal (All in one podcasting platform)

- Worked on backend of the Product. Worked on REST APIs to support features such as user comments, follow/unfollow podcasts, community creation along with other bugs and improvements.
- Implemented script to fetch podcasts from apple podcast and insert into the database. The script runs as a cron job regularly to update the records in database.
- Tech Stack : Python (Django), PostgreSQL

Aug 2018– Dec 2019

Full Stack Intern • Great Software Laboratory • Pune, Maharashtra

Human Resource Management System

- Revamped and maintained HRMS. Analyzed new requirements to design and create page layout, user interface and features and to develop landing page, dashboard and other sections.
- Implemented user permission/access module.
- Had direct contact with clients and simultaneously designed, implemented, repaired and monitored web pages and sites for continuous improvement. Upgraded the user flow of website (ex : vacancy approval process, etc.) as per changing requirements and demands.
- Tech Stack : PHP (Yii), MySQL, JavaScript

Meal Booking Portal

- Analyzed requirements, planned and implemented admin controlled pages (ex : meal addition, vendor addition, finance management, etc.) from scratch.
- Created dashboard for user controlled page (ex : meals booked, monthly spending, etc.)
- Tech Stack: Python (Django), MySQL, JavaScript
